

CH[®] HOT FEED

IMPORTANT PRODUCT INFORMATION

New Marine Engine Warning Kit

Protects engines from the two major causes of damage: no lubrication and overheating.

Warning buzzer sounds when engine oil pressure is too low and/or engine coolant temperature is too high.

Packaged in attractive, fast selling Bubble Pack

No. M-40177-BP

- For inboard and I/O engines.
- For use with 12 volt, D.C. electrical systems.
- Buzzer (No. M-4099) has plated steel case and moisture repellent insulator.
- Buzzer sounds when engine is started and will continue until operating oil pressure is reached.
- Oil pressure switch (No. 8606) operates at 3 to 7 p.s.i.
- Temperature switch (No. 84251) operates at 200°F (± 10°F).
- Installation instructions included.
- Standard packaging: one kit per bubble, five bubbles per carton.

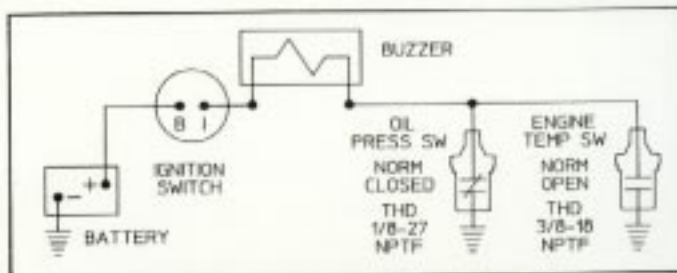

Warning Buzzer

Oil Pressure Switch

Engine Temperature Switch

Continually monitors engine oil pressure and engine coolant temperature.
