

TRAILER CONNECTOR

13 POLE

Technology is outpacing economics. As trucking companies attempt to reduce operating expenses tractor trailers are becoming increasingly sophisticated. Alarms, monitoring devices, communications equipment and other accessories requiring additional wiring and circuitry highlight the shortcomings of 7 pole connectors.

Meeting the needs of a sophisticated industry, Cole Hersee introduces the 13 Pole Trailer Connector — #12300 Socket & #12301 Plug.

The 13 Pole Connector's key features & benefits

1. Complete interchangeability with 7 pole plugs and sockets (SAE J560b).
2. A high degree of environmental sealing for extended life.
3. Adaptable to a variety of wiring combinations including twisted pair for advanced communication applications.
4. Highly reliable spring biased contact design provides redundant electrical contact points.

The 13 Pole Connector assists state-of-the-art systems

- Trailer ABS
- Trailer Temperature Monitoring
- Tank Overfill Monitoring
- Multiplexing
- Trailer Level Loading
- On Board Weighing
- Rear Vision/Blind Spot Vision
- Satellite Trailer Tracking
