NEW

High-Amp Rotary Switch For Forward/Reverse Applications

Specially designed to operate tarps and winches on vehicles, and windlasses on boats.

Responding to demand, Cole Hersee now offers a 50A DPDT switch with heavy duty components that deliver continued reliability. Constructed with heavy gauge (3/32" thick) terminals and silver-laminated contacts to resist arcing over a long working life.

With three positions: Momentary On - Off - Momentary On, the switch is ideal for activating forward or reverse motion of a motor. With a tarping system the motion would be Cover/Uncover, with a hoist or tailgate, Up/Down, or with a windlass Raise Anchor/Lower Anchor.

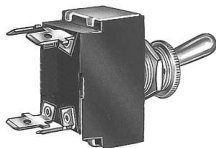

No. 75712-04

SPECIFICATIONS

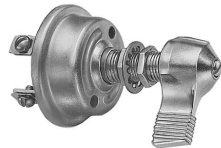

- 50A at 12V DC
- Plated steel case, 2.09" (53.08mm) diameter.
- 4 screw terminals, No.10-32 x .375" (9.52mm) screws, with lockwashers.
